I would say that, as laws are at present constituted, a proposal of marriage by a man means that he agrees, if the proposal be accepted, to endow the female with, if not all his worldly goods, at least so much of them as she can by gentle persuasion, trickery or by calling to her aid the present unjust and to the male very unfair laws gather unto herself.

and to the male very unfair laws gather unto herself.

As marriage is at present constituted, man gives and woman takes. Marrying and mating are not synonymous. Both men and women propose mating daily. Yet a proposal of marriage newsdays from man to woman is not only a proposal of mating but a promise of lifelong support and other material benefits to the woman. If woman proposes marriage she asks the man to bind himself with the present unjust laws, which all favor the female.

"In only a few cases I see a moral right for the woman to propose. She may do so if the conditions before marriage are all in her favor; as if she be rich and he poor, she healthy and he sick or a cripple.

### SCHOOL TO EXPERIMENT WITH INTENSIVE WORK

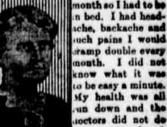

An experiment designed to apply methods of efficiency to school teaching, such as are employed in business. by advancing students according to their capacity, was begun yesterday in the Spayer School, in Lawrence Street, near Amsterdam Avenue. It is a joint enterprise by the Board of Education and the Teachers' College, which owns the school, and has been using it for experimental purposes.

Two hundred boys, who have completed the sixth year in the public "Dear Madam: In answer to the question, 'Should a wofnan propose?' I would reply 'Yes,' especially in the places where Woman Suffrage prevails, because if she has any eagerness to vote she also must desire to propose; that is, if she has need to, "A man, if he wants to marry a woman, after he courts her a while asks her to wed him. But generally if a woman loves a man and wants to marry him, she must wait till he proposes, and if he does not, might be made unhappy for life. The space of the sixth year in the public schools, have been selected for intensive work. They are divided into groups, and shifted about on the basis of individual progress. The boys with whom the experiment succeeds will be able, at the end of two years, to enter the second year of the city high schools, thus gaining one school year. Supt. Maxwell says there are 5,000 boys in the city schools who are capable of this rapid progress. The plan may be extended if it comes out right in the Speyer School experiment.

How to Rid the Skin of Objectionable Hairs

(Aids to Beauty)

A simplified method is here given for the quick removal of hairy or fuszy growths and rarely is more than ona treatment required: Mix a stiff paste with some powdered delatone and water, apply to hairy surface and after 2 or 8 minutes rub off, wash the skin and every hair has vanished. This simple treatment cannot cause injury, but care should be exercised to get real delatone.—Advt.
